

SMALL NATIVE PLANTS for SMALL GARDENS

This list has been compiled to suggest a selected range of small growing native plants suitable for establishing in Brisbane gardens. The list comprises natural species as well as cultivars which have been specifically developed for enhanced colour and form.

Many of these plants are on display at the 2016 NPQ Spring Flower Show, in the small plants display garden and also available for purchase from growers in the Plants Market.

To help you find plants you like the Grower Number is added beside the species.
