“Native bees can change the world. They are a magnet that brings individuals, families, schools and communities together in a different way. They are a non-intimidating member of the ecosystem that fascinates and motivates interest in the ‘operating instructions for our planet.’” - **Costa Georgiadis, ABC Gardening Australia**

## EVENT SUMMARY

An Evening with Australian Native Bees featuring Tim Heard, renowned entomologist and author of *The Australian Native Bee Book* (2016 Whitley Awards) along with ecologist and native bee expert, Tobias Smith will outline the crisis in global crop pollination and the role these fascinating insects can play in addressing it. Panel discussion and introduction to a working hive.
